

THE NEOPLAY PROJECT

Neoplay is the first cross-network, decentralized, provably fair dicing platform on both NEO and Ethereum

NEOPLAY OVERVIEW

Users will have the option to use Neoplay's native tokens (NPLAY & EPLAY) to reroll their losing bets against the house while the user's odds of winning remain unchanged. A user with enough tokens will never lose. This is made possible by our sister smart-contracts. Every token spent to invoke the reroll mechanic will be immediately burned. Rerolling will effectively reduce the total supply of tokens available as demand for rerolls stays constant. This built-in scarcity will appreciate the value of existing tokens.

PLATFORM

Provably Fair

Neoplay sources all random numbers generated from a provably fair source. Not pseudo random, but truly random.

Decentralized

Neoplay runs exclusively on blockchain where users can play without deposits and without registration. All winnings are instantly credited.

Investor Focused

Crowdsale contributors will be able to obtain both NPLAY & EPLAY tokens through Neoplay's crowd-sale contracts.

Open Source

All source code for Neoplay is made public and available on our GitHub.

Built For NEO & Ethereum

Our coequal sister smart-contracts are built for both NEO and Ethereum. Players can choose whichever, wherever, whenever.

First Mover Advantage

Neoplay is the first dicing smart-contract written for those wanting to play on the NEO blockchain.

NEOPLAY TOKENS (NPLAY & EPLAY)

Neoplay's Native Sister Tokens The "PLAY" tokens

Both tokens are functionally identical and operate the exact same way when invoked by the user.

Both tokens will also have their own unique total supply pool. The ERC-20 compliant EPLAY token is functionally identical to the NEP-5 compliant NPLAY token. Both tokens will allow players to reroll losing bets, both tokens will be permanently burned when used for rerolling, both tokens have their own supply pool, and both tokens will be credited to crowdsale participants.

**May 5th, 2018,
8:00 PM UTC**

CROWDSALE

Both tokens have a total max supply of 100,000,000 each. Both tokens will be sold together and both tokens are core to the Neoplay platform

-  **10% : Neoplay Founders**
-  **5% : Bounty**
-  **85% : Crowdsale.**
